### Golf Tip

#### LOOKING UP

**PROBLEM:** Anxious to see where your shot is going, you begin to look up during the downswing and before the clubface makes contact with the ball. This moves

the body, which misaligns the swingpath and produces terrible shots -- or even a complete whiff!

Many feel that this is the number one mistake that golfers make. To minimize this problem:

- Rotate your hips properly through impact,
- Keep arms fully extended through impact,
- Concentrate on a low follow-through.
- Wait until you see the ball "disappear" before taking your eyes away from it.

## Monthly Joke

Golf is by far the ultimate love/hate relationship. Sometimes it seems as though your cup runneth and moveth over.

## Truisms in Golf

To calculate the pace of a player's downswing, multiply the speed of the backswing by their handicap. Example: backswing 20 mph, handicap 15, downswing 300 mph.
